### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marcia Doubet on 07/21/05.

The application has been amended as follows:

In the Claims

In Claim 1, in line 1, after "A" please insert --computer implemented--.

Please cancel Claim 63.

Please cancel Claim 64.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance are the inclusion of the following limitations in each of the independent claims drawn to a method, system, and computer program product embodied on computer-readable media for building distributed software services as aggregations of other services:

“for each located service, providing the located service to a service composition tool with which a user can select provided services to build new distributed software services, if the located service has a deployment interface specification associated therewith and a functional interface specification associated therewith, the deployment interface specification adapted for representing the located service in the service composition tool and the functional interface specification adapted for enabling a proxying component to provide access to the located service from the content aggregation framework.” (from Claim 1)

The subject matter in these limitations is not taught by the cited prior art and is furthermore, non-obvious in view of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

***Pertinent Art***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. U.S. Patent 6,189,138 by Fowlow et al. “Visual composition tool for constructing application programs using distributed objects on a distributed object network”

February 13, 2001. Does not disclose any type of similar interface specification for use with the composition tool as those claimed in the independent claims.

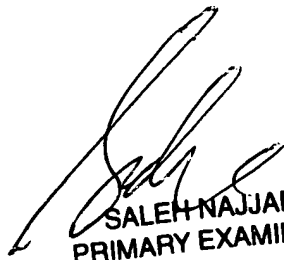

5. U.S. Patent 6,564,251 by Katariya et al. "Scalable computing system for presenting customized aggregation of information" May 13, 2003. Describes some aspects of service aggregation but does not disclose a composition tool using the interface specifications as claimed.
